**DETAILED ACTION**

1. The Amendment filed on June 13, 2003 has been entered.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-15, 17, 19-21, and 23-24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cornell et al. See whole patent.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 16 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cornell et al in view of Judd et al.

Cornell et al discloses the invention substantially as claimed except for a measuring instrument rotatably coupled to the base. However, Judd et al clearly teaches a measuring instrument (24) rotatably coupled to the base (12) of a trimmer device for the purpose of providing a enhanced support for the work to be cut. See Figs.

Art Unit: 3724

1-3, c. 3, ll. 28-43. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Cornell et al with the rotatably coupled measuring instrument as taught by Judd et al in order to facilitate enhanced support for the desired dimension of work to be cut.

### ***Response to Arguments***

5. Applicant's arguments filed June 13, 2003 have been fully considered but they are not persuasive.

In response to Applicant's basic argument that Cornell et al does not anticipate the claimed invention, this argument is traversed. The argued features are exactly the same as shown in Fig. 11 which is the same as that shown in Figs. 3-4 in Cornell et al. Thus, Cornell et al clearly anticipates the claimed invention.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the
